

Viettel Telecommunications Network Equipment Manufacturer (VTCORE) is a member of Viettel Group. Founded in 1st May 2014 (Tax code: 0100109106), our main role is to research, design, develop, delivery and imply the telecommunication products in which will further promote the Viettel Group's commercial activities. We are the pioneer in researching and developing core application, access solution, etc... for mobile telecommunication based on GSM, UMTS, and LTE technology. Our organization consists of only trusted and high qualified employees, young and dynamic.

Follow up the plan in 2015 and long term development course, we will constantly develop and commercialize higher quality products for local and international market. To ensure that future, we need more high qualified employees, both local and foreigner. Thus, we are recruiting several positions including hardware and software engineers.
